+

Step 2: Recording Editorial Manager Footage

Journal A + Camtasia

1. Configure necessary items based on script prior to filming

2. Use Camtasia to film full screen while completing actions in EM.

3. Make basic adjustments (cropping, size, large scale edits in Camtasia); export to .mov file.

Step 3: Graphics

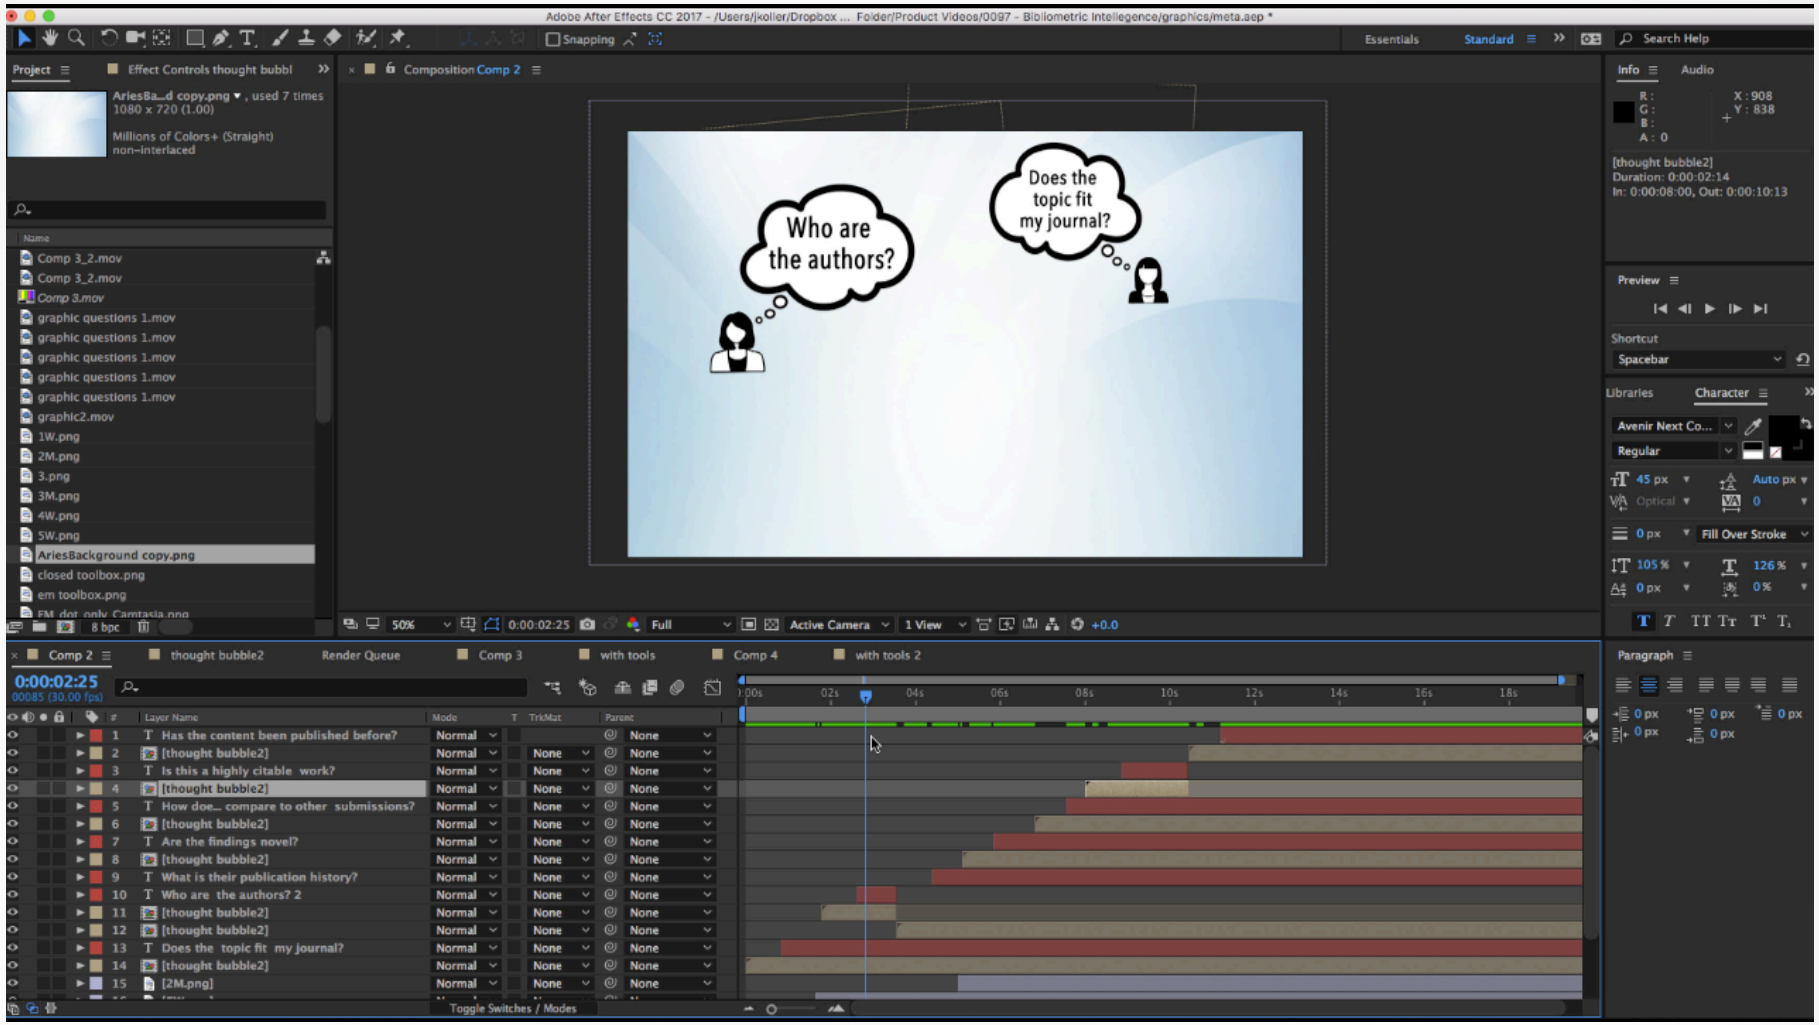
Adobe Illustrator, Photoshop, and After Effects

Create vector images

Edit photos or create Bitmap images

Motion graphics/ Special Effects

Add files to AE as layers and animate



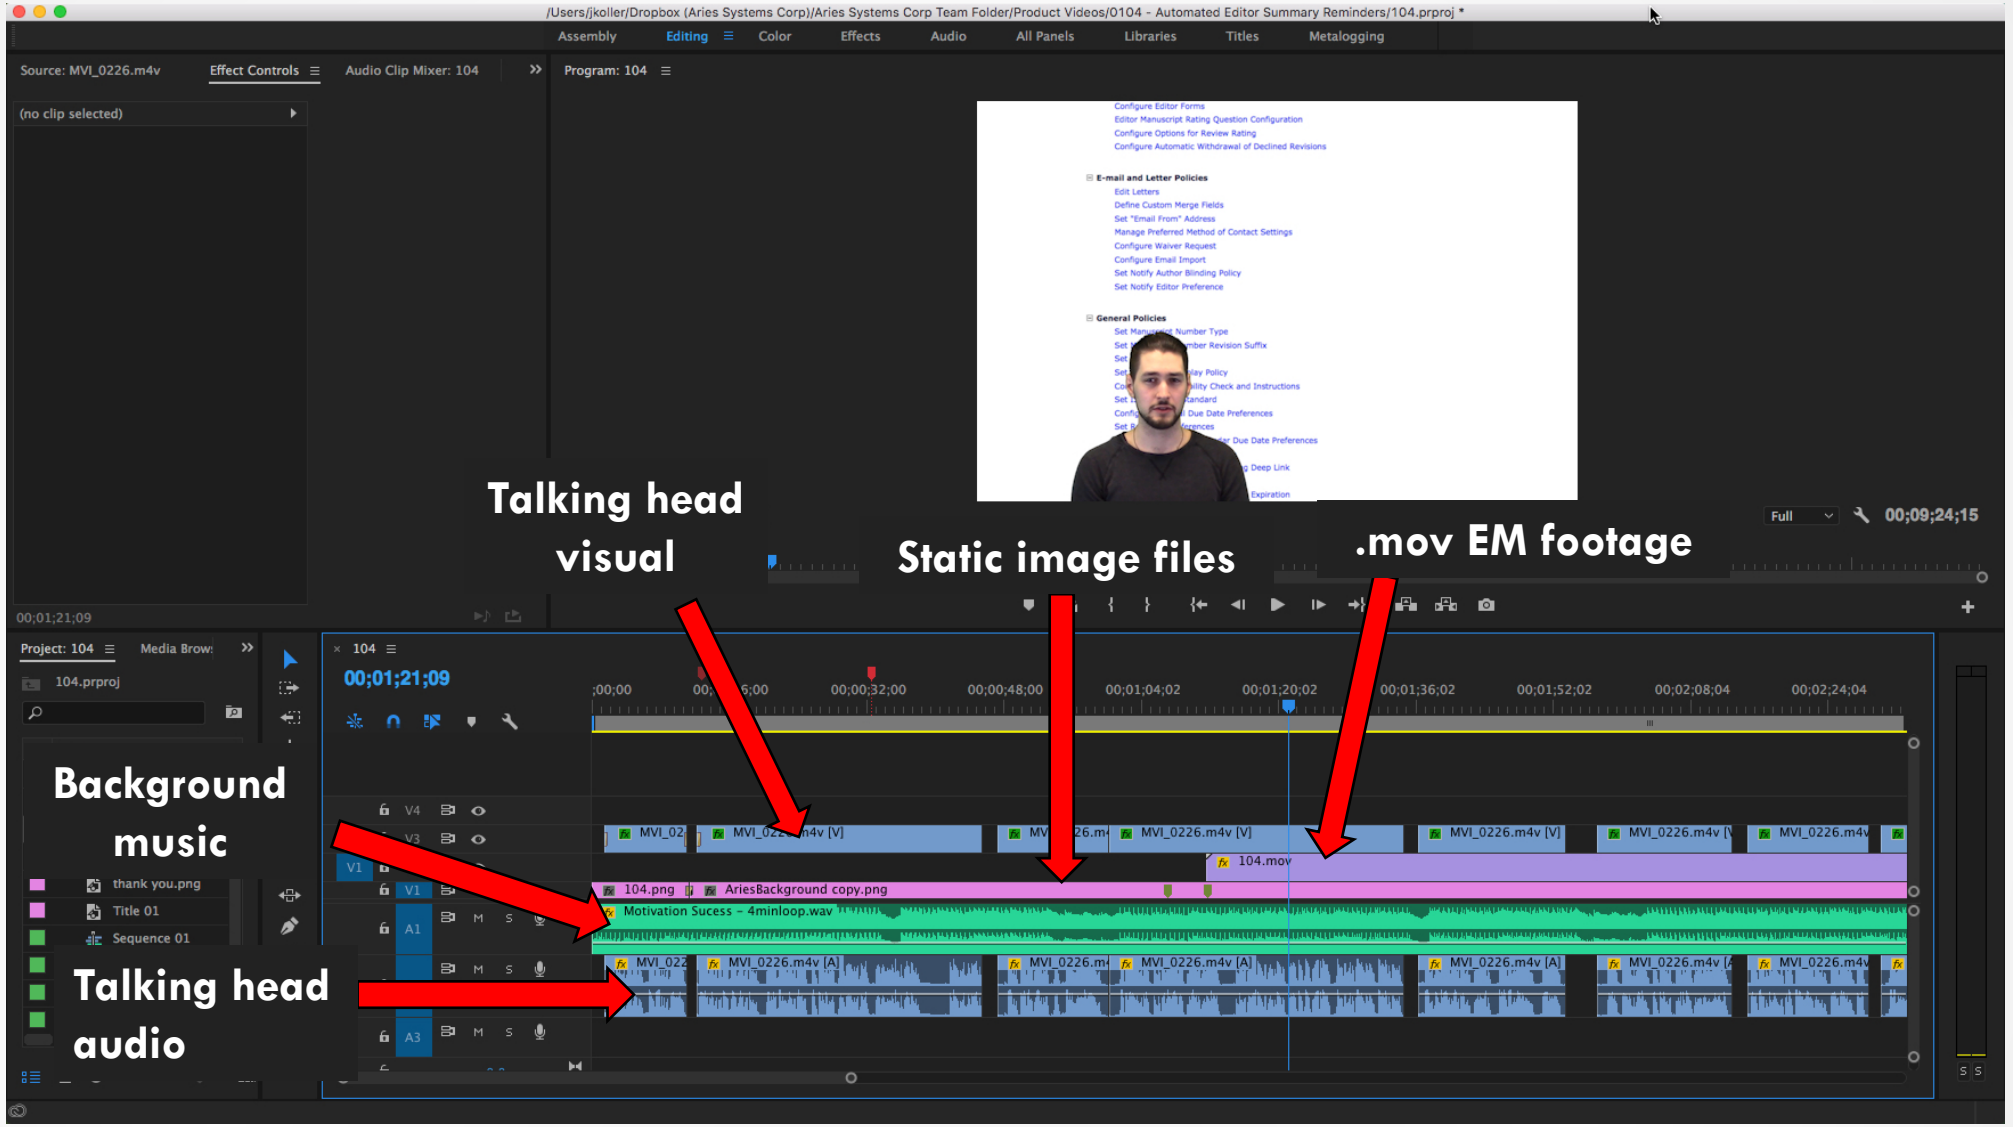
Export/save graphics

Step 4: Premiere Pro or After Effects final edits

Premiere Pro file inventory:

- Aries Background image
- Cover slide with video topic
- Closing slide with thank you message
- Video of talking head or voiceover file
- Animated graphics, logos, various images
- Screenshots and recorded footage from EM
- Music or sound effects
- Mouse animations
- Text layers

Premiere Pro editing process



Premiere Pro editing process

Once files are loaded…

1. Edit talking head
   - Remove green screen
   - Color correct
   - Edit for best takes & content
   - Noise reduction/audio quality

2. Align talking head to EM footage
   - Highlight/zoom
   - Add mouse movements, clicks

3. Final touches
   - Motion graphics
   - Music
   - Transitions

Step 5: Approvals & Posting

Using Sub-Reports to Provide Additional Detail
